Auditor Talk (Tailor Made for China)

Why this workshop (Auditor talk) is important?

Efficient audit will undoubtedly avoid losses for the organization, in which the role of the auditor is crucial. Even if many auditors have successfully completed the necessary courses, such as VDA 6.3, IATF 16949, the effectiveness of the audit may not be achieved quickly, because the opportunity to learn and communicate with experienced professional auditors is not readily available.

That's why VDA QMC created this new "Auditor talk", it is so important to practice and interact with VDA expert.

The Auditor Talk is an offer and focused on VDA 6.3 auditors, who would like to have informal conversations at auditor expert level with other VDA 6.3 auditors moderated by our VDA QMC Trainers – about current developments, deviations between theory and practice or typical challenges in dealing with regulations, evaluation of N/C and audit result presentation (also including explanation, why it is a mayor or minor N/C).

VDA QMC China has created this (Tailor Made for China) Auditor Exchange Workshop day, with cases, discussions and opportunity for great exchange under auditor experts.

Standards associated with this Workshop

VDA 6.3: 2023/ ISO19011: 2018

Based on the audit guidelines of ISO19011, through the study of this seminar, you can understand the general process of audit/non-conformance structure, and discuss and experience special scenarios in P5/6/7 of VDA 6.3 that may occur during the process of "theory with practice" .

Objectives and Methodology

Regular exchange to clarify technical and methodological issues related to the VDA 6.3 audit. Moderated discussion with short keynote speech and preparation of N/C cases to discuss under experts. Guidance from VDA QMC China Trainer will be provided in addition.

Workshop Introduction

Training ID: 839

Duration: 1 day

Public training fee: 1,500 RMB/person (incl. VAT)

Price including: Lunch during the training day and training material.

Target Audience

- VDA 6.3 auditors (should perform minimum 5x VDA 6.3 process audits)
