## VDA 标准

VDA QMC 标准由质量管理中心的项目组编写。

项目组成员于项目周期内借调履职，依托自身专业知识与实践经验，助力质量管理标准的编制工作。

相关成果通常以“黄皮书”形式发布，在为期三个月的意见征询期内，所有利益相关方可对文件内容提出意见建议。唯有充分吸纳整合这些反馈意见后，新版质量管理标准才会正式发布，项目组亦随之解散。

正是得益于整车厂商与供应链各方的积极参与和通力协作，才共同形成了这份代表行业先进水平的规范性成果文件。

德国汽车工业协会质量管理中心中国分公司主要负责将这些标准翻译为中文，以助力其在华的理解与推广。同时，围绕部分标准的修订与新标准的制定，德国汽车工业协会质量管理中心中国分公司根据德国总部的工作机制成立相应的工作组与项目组，在标准制定的早期阶段即引入中国市场的实践经验、技术需求及行业反馈，推动中方观点在标准拟定过程中得到充分讨论与体现。

## VDA Standards

The VDA QMC Standards are drafted by the QMC project groups.

The members of the project groups are seconded for the duration of the project to contribute their knowledge and practical experience to the development of the QM standards.

The result is usually presented as a so-called “yellow volume”, which can be commented on by all stakeholders during a three-month objection period. Only after this feedback has been taken into account is a new QM standard published and the project group discharged.

Thanks to the strong participation and cooperation of both manufacturers and the supply chain, a collective “state-of-the-art” is created.

VDA QMC China is translating those standards into Chinese to facilitate better understanding and wider distribution in the Chinese market. At the same time, in response to the revision of certain existing standards and the formulation of new ones, VDA QMC China has established corresponding working groups and project groups in accordance with the operational mechanisms of German headquarters. By incorporating practical experience, technical requirements and industry feedback from the Chinese market at the early stage of standard development period, it ensures that Chinese perspectives are fully discussed and reflected in the standard-drafting process.
